Hunters Pt Rad RACRs reviews 2016 PRG Calculator 8-23-2016.docx

Attached is a revised version of an internal memo I started in May to pull together Rob's calculations using the 2016 version of the PRG calculator of potential release criteria based on different exposure scenarios and of risk from residual concentrations as reported in prior RACRs. I've tried to keep it simple – mostly quoting from public documents and tables of calculations. The numbers can speak for themselves. Please comment. Thanks!
